

# AGRI-HORTICULTURE MULCHING FABRICS

100% polypropylene,  
chemical free permeable  
nonwoven mats  
with enhanced UV resistance,  
specially designed to:

- Prevent the growth of weeds
- Optimise productivity
- Reduce the need for spraying

In nurseries, greenhouses,  
gardens & landscaping centres

WITHOUT MULCHING FABRIC

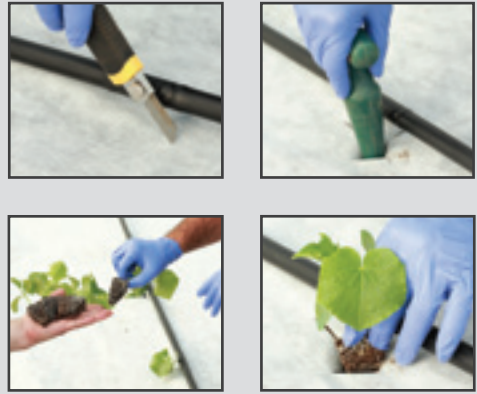

WITH MULCHING FABRIC

# THE EASY WAY TO PREVENT WEED GROWTH

## THRACENG MULCHING FABRICS:

- **Suppress weed growth** by preventing the sunlight from reaching the roots of weeds.
- **Eliminate the need for pesticide** and herbicide use.
- Allow air and water to pass through, **creating a stable environment** that encourages plant growth.
- **Reduce erosion** and have extended life span if covered with mulch or soil.
- **Fit easily** around existing plants.
- Can also be **pre-cut for new plantations**.

### EASY TO INSTALL

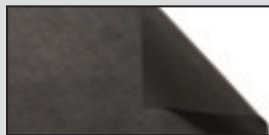

## CHARACTERISTICS & SPECIFICATIONS

- Available on demand in several weights up to 150 gr/m<sup>2</sup>.
- Standard roll lengths: 50 m and 200 m. Also available in other lengths upon demand.
- Standard roll widths: 0.80 m / 1.10 m / 1.60 m. Also available in other width sizes upon demand.

### Differently coloured surfaces:

Side facing down: **Black** (standard). Side facing up: **White** (reflecting the sunlight to plants and reducing the temperature of the ground - appropriate for use in greenhouses and farms), **Green** and **Brown** (appropriate for gardening).
